SUMMARY

Full Stack Developer (Fresher) skilled in HTML5, CSS3, JavaScript (ES6+), React.js, and Spring Boot, with hands-on experience designing responsive UIs and building secure, database-driven web applications. Comfortable working across the stack, with a solid grasp of testing fundamentals and cross-browser, performance-focused development.

TECHNICAL SKILLS

Languages: Core Java, Java 8+, JavaScript (ES6+)

Backend: Spring Boot, Spring Security, Spring MVC, Hibernate JPA, REST API, JWT, JDBC, Maven

Frontend & Database: React.js, HTML5, CSS3, Bootstrap | Oracle SQL, PostgreSQL, MySQL

Integrations & Tools: Google Gemini API, Spring Mail, Git, GitHub, Postman, Swagger

Testing & QA: STLC, Unit / System / Regression / Smoke / Sanity Testing, Test Case & Scenario Design

Concepts: SDLC, Agile (Basic), OOP, Data Structures, Multithreading, Debugging

PROJECTS

Human Resource Management System (HRM Portal) | *Spring Boot | Spring Security | React.js | PostgreSQL | JWT | Google Gemini API*

- Built a full-stack, role-based HR management platform with separate Admin and Employee portals covering employee records, leave management, timesheets, recruitment, and performance reviews on a layered Spring Boot architecture.
- Implemented JWT-based authentication and Spring Security role-based access control (RBAC) to secure REST APIs, restrict cross-role access, and enforce hardened CORS and environment-based secret management.
- Integrated Google Gemini AI to build a context-aware chatbot that answers HR policy questions and retrieves real-time employee data (leave balances, pending approvals) directly from PostgreSQL.

Employee Management System | *Spring Boot | Hibernate JPA | PostgreSQL | REST API*

- Designed and developed a backend application using Spring Boot following layered architecture (Controller, Service, Repository).
- Created RESTful APIs for complete CRUD operations — adding, updating, retrieving, and deleting employee records.
- Implemented entity mapping and database integration using Hibernate JPA with PostgreSQL, with custom exception handling (ResourceNotFoundException) for structured, production-ready error management.

MovieSearch App – Movie Discovery Web App | *React.js | Axios | React Router | JavaScript ES6+ | CSS3*

- Built a React SPA to search and browse movies using the OMDB REST API with React Router DOM for multi-page navigation.
- Used useState, useEffect, and useRef hooks to manage search state, trigger API calls, and handle input focus; created a custom hook to abstract API logic for reusable, cleaner code.
- Built a reusable MovieCard component with props to render movie poster, title, and year across pages.

EDUCATION

Z.B.P. College, Dhule, Master of Science (Information Technology)

CGPA: 8.48 | 69.82% | 06/2023 – 05/2025 | Dhule

Z.B.P. College, Dhule, Bachelor of Science (Information Technology)

CGPA: 8.98 | 77.67% | 06/2020 – 05/2023 | Dhule

Higher Secondary Certificate (HSC),

Percentage: 68.77% | 2018 – 2020 | Dhule

Secondary School Certificate (SSC),

Percentage: 83.80% | 2018 | Dhule

COURSES

Java Full Stack Development, QSpiders Pune (Completed) | 06/2025 – 05/2026

ADDITIONAL INFORMATION

Languages: English – Intermediate, Hindi – Fluent, Marathi – Native
